

December 2009

Are you aware that your sewer service charge for the entire fiscal year is **STILL** based on how much water you use during the January and February meter reading period? **Yes!**...you can still have control of how much your sewer charges will be for the next fiscal year!

NOTE: 12 unit minimum annual sewer charge applies.

Lowering your sewer charges is easy to do, but must be done NOW! All YOU have to do is reduce YOUR water consumption as much as YOU can from January 2 through March 4, 2010 (**meter reading is dependent on weather conditions**). The sewer charges on your annual property tax bill for fiscal year 2010/2011 will reflect YOUR savings based on the amount of water YOU have conserved during Jan-Feb. 2010.

NOTE: 12 unit minimum annual sewer charge applies).

NOW is the time to check all household plumbing fixtures and have them repaired if they are leaking. Leaky faucets and silent toilet leaks can cause your water bill and sewer service charge to DOUBLE. You can easily check your residence for plumbing leaks. Please call, send e-mail, or visit our website for more information:
